Our High Temperature Textiles are available in three different temperature ratings: 2300F, 2000F & 1000F

- Ceramic Cloth 2300F with Glass or Metal insert (1/8" thick x 39.4" wide)
- Ceramic Tape 2300F with Glass or Metal insert (1/8" thick x .5", 1", 2", 3" & 6" wide)
- Silica Cloth 2000F (18oz & 36oz x 36" wide)
- Silica Tape 2000F (1/16" & 1/8" thick x 1", 1.5", 2", 3" & 4" wide. PSA available on all sizes)
- Fiberglass Cloth 1000F (many thicknesses x 40 & 60" wide)
- Fiberglass Tape 1000F (1/16", 1/8" & 1/4" thick x 1", 1.5", 2", 3", 4" & 6" wide. Bolt Hole & PSA too)

Ceramic Cloth & Tape 2300F

These durable, ceramic fiber fabrics are well suited for industrial applications requiring strong, yet flexible, high temperature resistant materials.

Silica Cloth & Tape 2000F

- The Tape is also available with PSA (adhesive backing)
- Applications include Expansion Joints, Furnace Curtains, Insulation Pads & Heat Shields.

Fiberglass Cloth & Tape 1000F

- Fiberglass Cloth is used in industrial heat protection applications, including welding cloth, fabricated parts, etc.
- A Vermiculite coating can be added to ensure higher protection from heat up to 1200F.
- A Silicone coating can be impregnated for removable insulation covers, spray shields or gaskets, but reduces the rating to 600F.
- The Tape is also available in Bolt Hole, PSA & Tadpole.
